

Lake Powell: National Park Service

Policy for Fishing Tournament and Other Special Use Permits

“Permittee shall ensure that each participant has cleaned and inspected their boat for exotic plants and animals, such as zebra mussels, prior to launching at Lake Powell. If participant suspects such contamination, the entire boat and trailer must be thoroughly washed with hot water (>140 F) and all live wells, bilge areas, engine cooling systems, and any other standing water will be drained and flushed with hot water before the boat can be launched.”
